Camera Shots Video Project

Background:

Basic camera shots & camera movements are essential and necessary to produce quality videos. Using different camera shots & movements properly is the start to a quality video production.

Problem:

The assignment is to record required camera shots & movements, import these into an editing program, edit the shots (& add effects, text, music,etc)to produce an interesting movie, finalize the movie, and hand in electronically by the due date given by the teacher.

Design Requirements:

~The finished video should by approximately 1-3 minutes in length.
~Videos will be handed in electronically & then viewed by the teacher and class.
~Your movie needs a Title & Credits.
~LABEL each shot & movement with some sort of text – make sure the text stands out from your clip & is easy to read. SPELLING MUST BE CORRECT!
~Add transitions where you see fit (and so your video flows smoothly!)
~Add any other effects to make your movie interesting (speed up/slow down, video effects, etc)
~Add audio – YOUR VIDEO CLIPS SHOULD BE MUTED. THE AUDIENCE SHOULD NOT HEAR VOICES FROM THE CLIPS, UNLESS YOU CHOSE A SINGING/SPEAKING ACTIVITY.
~Hand in on time. Due date will be given by teacher.

CAMERA SHOTS & MOVEMENT -

**YOU MUST INCLUDE EVERY SHOT & MOVMENT LISTED BELOW.
The shots & movement can be in any order.

EXTREME WIDE SHOT
WIDE SHOT
MEDIUM SHOT
MEDIUM CLOSE UP
EXTREME CLOSE UP
CLOSE UP SHOT

Pan
Tilt
Zoom
Tracking

Evaluation:

Students will be graded on the basis of completing the project on time with all the required camera shots & movement.
